2020 Institutional Repository (IR) Report

Sarah Ellsworth MLS

2020 Institutional Repository (IR) Report

A brief report of information and statistics on the globally accessible IR. This is managed and compiled by the Parkview Health Resource Librarians. Our IR platform is Digital Commons provided by Bepress

Direct IR Link: https://researchrepository.parkviewhealth.org

Statistics

244 - Number of total publications in IR

Download & Metadata Statistics (1/1/2020 – 12/31/2020)

2,187- Number of Downloads

2,301- Metadata Page Hits

69 Works posted

Top 10 downloaded publications in 2020

Title	Downloads
College students in distress: Can social media be a source of social support?	436
"Notjustgirls": Exploring Male-related Eating Disordered Content across Social Media Platforms	139
2018 March Parkview Signature Care Thought Leader Forum	120
Parent's Feelings about School Reopening during COVID-19: Survey Results from Northeast Indiana	95
Parkview Heart Institute Telecardiology Consultation Service (PHI-TCS) Outcomes	80
Scope of Artificial Intelligence in Screening and Diagnosis of Colorectal Cancer	71
The Impact of MyChart (ePHR) Use on the Clinical Outcomes of Behavior-Related Modifiable Health Conditions	64
2018 July Parkview Signature Care Thought Leader Forum	58
Near-resolution of persistent idiopathic facial pain with low-dose lumbar intrathecal ziconotide: a case report.	52
Computer-based insulin infusion protocol improves glycemia control over manual protocol.	48

PLUMX Snapshots

PLUMX Snapshots: PlumX gathers and brings together appropriate research metrics for all types of scholarly research output. **This is compiled NR specific data is from 2017-2020**. See Appendix for details.

Usage Metrics

29500 Abstract Views

3431 Download Counts

Current Repository Introduction/About

About Our Repository

The Parkview Health Research Repository is Parkview's new institutional research repository, a place where research and scholarly output will be preserved and shared with the general public. Made possible by the Parkview Resource Library, the Parkview Health Research Repository is on a Parkview-branded site on the Digital Commons Network™, which makes the work created at Parkview accessible worldwide through permanent URLs while establishing intellectual property rights.

Parkview is one of the first nonacademic health systems to have an institutional research repository, which was developed by Parkview Librarians. In fact, we are one of only 11 in the nation, five in the Midwest and the first in Indiana.

Parkview Health Research Repository Goals:

- Increase visibility of, and access to, Parkview Health researchers by disseminating publication information.
- Showcase individual researchers, clinical specialties, and Parkview as part of the system's publishing initiative.
- Identify and maintain an enduring, digital record of Parkview research in the format of publications, presentations, and posters.
- Increase awareness and provide support of Parkview Health programs.

All Parkview employees active in professional publications/articles, posters, presentations are asked to submit their information to be included in the repository

---

This Report was Compiled by Sarah Ellsworth-Hoffman, MLS, Parkview Medical Librarian in January 2021. Please contact her if you have additional questions or would like to discuss modifications or possibilities.

PLUMX Metric Log and Explanations: Metrics as of November 11, 2020

Usage Metrics

Article level usage metrics are the number one statistic that researchers want to know after their citation counts. Is anyone reading our work? Did anyone watch our videos? PlumX is unique in combining artifact-level Usage data with other artifact-level metrics. Below is a listing of the current Usage metrics that PlumX supports, and the providers of the data.

Metric	Source(s)	Description
Abstract Views	Airiti iRead eBooks, Airiti Library, CABI, Digital Commons, DSpace, EBSCO (historical only), ePrints, Expert Gallery Suite, RePEc, SciELO, SSRN	The number of times the abstract of an artifact has been viewed
Clicks	bit.ly	The number of clicks of a URL
Collaborators	GitHub	The number of collaborators of an artifact
Downloads	Airiti iRead eBooks, Airiti Library, Digital Commons, Dryad, DSpace, EBSCO (historical only), ePrints, Expert Gallery Suite, figshare, Github, Institutional Repositories, Mendeley Data, Pure (for select customers only), RePEc, Slideshare, SSRN	The number of times an artifact has been downloaded
Full Text Views	Airiti iRead eBooks, CABI, EBSCO (historical only), OJS Journals, PLOS, PubMedCentral (for PLOS articles only), SciELO	The number of times the full text of an article has been viewed
Holdings	WorldCat	The number of libraries that hold the book artifact
Link Outs	EBSCO (historical only)	The number of times an outbound link has been clicked to a library catalog or link resolver
Plays	Digital Commons, Vimeo, YouTube, SoundCloud	The number of times the video or audio has been played

Metric	Source(s)	Description
Views	Mendeley Data, Dryad, figshare, Slideshare	The number of times the artifact has been viewed

Citation Metrics

Citation counts in PlumX are measures of how many times your research has been cited by others. Including citation counts alongside the other modern metrics categories allows for side-by-side analysis.

The following are the sources of citation counts that are currently in PlumX.

Metric	Source(s)	Description
Citation Indexes	Airiti Academic Citation Index	The number of Airiti ACI works that cite the artifact
Citation Indexes	Chinese Science Citation Database	The number of Chinese Citation Database (CSCD) works that cite the artifact
Citation Indexes	CrossRef	The number of articles that cite the artifact according to CrossRef
Citation Indexes	PubMed Central	The number of PubMed Central articles that cite the artifact
Citation Indexes	PubMed Central Europe	The number of PubMed Central Europe articles that cite the artifact
Citation Indexes	RePEc	The number of RePEc works that cite the artifact as computed by CiTEc
Citation Indexes	SciELO	The number of SciELO articles that cite the artifact
Citation Indexes	Scopus	The number of articles that cite the artifact according to Scopus
Citation Indexes	SSRN	The number of SSRN works that cite the artifact

Metric	Source(s)	Description
Patent Citations	USPTO	The number of patents that reference the artifact according to the United States Patent and Trademark Office
Patent Family Citations	EPO, IPO, JPO, USPTO, WIPO	The number of patent families that reference the artifact according to the European Patent Office (EPO), World Intellectual Property Organization (WIPO), Intellectual Property Office of the United Kingdom (IPO), United States Patent and Trademark Office (USPTO) and Japan Patent Office (JPO)
Clinical Citations	Dynamed Plus Topics (historical only)	The number of Dynamed Plus Topics that reference the artifact
Clinical Citations	PubMed Clinical Guidelines	The number of Clinical Guidelines from PubMed that reference the artifact
Clinical Citations	National Institute for Health and Care Excellence (NICE) – UK	The number of Clinical Guidelines from NICE that reference the artifact
Policy Citations	Policy document source lists curated by PlumX	The number of policy documents that reference an artifact

Capture Metrics

Captures track when end users bookmark, favorite, become a reader, become a watcher, etc. Captures indicate that someone wants to come back to the work. Captures are important because they are an early, leading indicator of future citations.

Below is a table of the metrics sources that PlumX uses for capture metrics.

Metrics as of November 11, 2020

Metric	Source(s)	Description
Bookmarks	Delicious (historical only)	Number of times an artifact has been bookmarked

Metric	Source(s)	Description
Favorites	Slideshare, SoundCloud, YouTube	The number of times the artifact has been marked as a favorite
Followers	GitHub	The number of times a person or artifact has been followed
Forks	Github	The number of times a repository has been forked
Readers	CiteULike (historical only), Goodreads, Mendeley, SSRN	The number of people who have added the artifact to their library/briefcase
Exports/Saves	EBSCO (historical only), SSRN	This includes the number of times an artifact's citation has been exported direct to bibliographic management tools or as file downloads, and the number of times an artifact's citation/abstract and HTML full text (if available) have been saved, emailed or printed.
Subscribers	Vimeo, YouTube	The number of people who have subscribed for an update
Watchers	Github	The number of people watching the artifact for updates

Social Media Metrics

Social media metrics are the +1s, likes, shares, and tweets about research.

By tracking social media metrics, you can see how well a researcher is promoting their work. This is especially important for early career researchers to measure and understand who is interacting with their work. Of course, social media also allows us to track the buzz and attention surrounding research.

The following table lists the sources that PlumX tracks for Social Media.

Metrics as of October 15, 2018

Metric	Source(s)	Description
Likes	Vimeo, YouTube	The number of times an artifact has been liked
Shares, Likes & Comments	Facebook	The number of times a link was shared, liked or commented on

Metric	Source(s)	Description
Ratings	Amazon, Goodreads, SourceForge	The average user rating of the artifact.
Recommendations	Figshare, SourceForge	The number of recommendations an artifact has received
Scores	Reddit	The number of upvotes minus downvotes on Reddit
Tweets	Twitter via Gnip	The number of tweets and retweets that mention the artifact
